Australian Native Plants Society (Australia)

www.anpsa.org.au Website includes plant guides.

SOURCES OF AUSTRALIAN NATIVE PLANTS IN THE CANBERRA REGION

This listing of the diverse sources of native plants is dedicated to those who have studied, propagated, promoted and enjoyed Australian native plants of and in the ACT region for many decades.

Their experiences reveal that:

- site & aspect assessments
- researching species' needs and water requirements
- thorough site & soil preparation leads to higher success rates from planting

Planting small, healthy plants will surpass expectations from larger specimens bought for instant effect.

The list's aim is to inform potential buyers where the plants they seek may be available. The list does not imply endorsement by the compiler or the Australian Native Plants Society. Please consult nurseries' websites or phone for advice & more details ahead of travelling to the outlets.

Rosemary Blemings, compiler.
